2002 NEW LEADER. NEW RULES.

# AFTER TWENTY YEARS AT THE HEAD OF THE CLASS, WE STILL BELIEVE IN CONTINUING EDUCATION.

*"Malibu's unique approach to building boats has pushed it to the front of the ski boat industry." — WaterSki Magazine*

After 20 years of building award-winning boats you would think we had established a tradition. We have. Our tradition is asking "what if?" Without the passion for knowing "what if?" we might never be challenged to change a thing. But we're dreamers, and we hate to do anything the same way twice if we can improve upon it by changing it. With input from the world's best water sports athletes and the more than 30,000 enthusiastic Malibu owners scattered about the world, we get a lot of answers to that question. That's why our boats keep getting better. We like turning your dreams into reality.

Thanks to that input, we build boats that don't just endure: they prevail. From our first Boat of the Year Award to our most recent World Record performance, Malibu boats have proven not only reliable, but also exceptional under the most challenging conditions. There is an enduring value in the Malibu name. When you own a Malibu, you have the benefit of all our rigorous testing and input from the best water sports enthusiasts in the world. With Malibu, you know each member of your family can pursue their sport as far as they want to go. It's our job to give you that extra edge. We support your dreams.

« There's more to Malibu boats than our infectious enthusiasm. After all, we couldn't just charm our way into 12 Product Excellence Awards, 9 Boat of the Year Awards, 8 Industry-leading Innovations, 5 World Record performances and 1 U.S. Patent in the last decade.

# THE POWER OF FORWARD THINKING.

We don't know of another boat company that approaches their work the way Malibu does. Our rules are simple: Build the best. Be cutting edge. Pour all your passion into the product. We find our inspiration in the dreams and aspirations of our engineers as well as the people who own our boats. While we're looking toward the future, other companies embrace the past; resisting change as they adhere to the rigid boundaries of what has worked before. Some companies find comfort in that approach. It feels safe. We think feeling safe makes you complacent. Being complacent doesn't lead to award-winning innovations. Creative thinking, passion for your work and pride in your product does. We nurture those qualities at Malibu. So when you buy a Malibu boat you can rely on our ongoing interest in the product. We just won our unprecedented 12th product excellence award. It's amazing what a boat company can do when it embraces the unexpected and defies tradition. At Malibu, we follow our own rules.

## PERFECT PROPS >>

At Malibu, we know boats and we know water sports. We understand that wakeboarding and slalom skiing demand control of speed and a full range of torque for a truly exceptional pull. So we invest in precisely machined CNC propellers in place of the standard cast props used by our competitors. Every Malibu comes standard with this exclusive propeller for greater torque, smoother power delivery and its exceptional ability to hold speed. It contributes to the uncanny control and precision you feel behind the wheel of every Malibu.

ed in a wood, and I think the one less common to  
all the difference." — Robert Frost

# A STRONG, SILENT FOUNDATION.

Endowed with proven technologies like the patented Fiberglass Engine Chassis System (FibECS) Malibu boats are the quietest and most durable boats on the water. Designed by a laminate engineer utilizing computer stress modeling techniques, FibECS has performed flawlessly since its inception in 1993, resulting in zero failures in over 20,000 boats. Gel coated and perfectly finished for easier cleaning and proper fit and finish, there are no sharp, raw or rough fiberglass edges to catch a finger. Even the wire looms are properly wrapped and routed through the system.

FibECS is designed to eliminate drive train vibration through its wider engine displacement and through-bolted engine procedure. Hydrophonic dampening provides additional stiffness around the shaft area and utilizes the natural dampening qualities of water to dampen prop thrust for vibration free comfort.

Like so many other Malibu systems, this type of advanced engineering and resulting durability has propelled Malibu to the top of the water sports industry.

Active air induction for increased engine performance.

## EXHAUSTIVE TESTING IS NATURAL.

Before Malibu engineers sign off their approval on any component or system, it must pass tests in the most extreme conditions. Our patented swivel head pylon and its mounting system were first tested with over 2,000 pounds of lateral resistance. While that may seem excessive, this kind of testing has helped Malibu become the template of high quality in the marine industry.

From the custom-wrapped throttle knob to the phone plug in, to the oversized drink holder, Malibu turns fingertip convenience from buzzword to reality.

When you're concentrating on where you're going and how you'll get there, you don't want any distractions. Malibu has designed the most ergonomically pleasing driver's seat and dash in the industry. The 5" gauges are easy to read at a glance. The swivel seats with air lumbar and padded arm rests coax you into comfort the moment you sit down. If you take the time to look around, you will notice impressive detailing found only on Malibu boats: French stitched dash upholstery, illuminated rocker switches, decorative metallic insert panels and matching steering wheel. Even the throttle knob is custom wrapped.

Drivers can assimilate information at a single glance with Malibu's highly visible 5" Servo driven gauges, another innovation introduced by Malibu's forward-thinking engineers.

Driving isn't just pleasurable because your cockpit is comfortable. Malibu engineers added Instantaneous Response Technology (IRT) for Incredible driver throttle control and handling. IRT is the marriage of Rack & Pinion steering, Zero Friction throttle cables and custom underwater gear to create the finest handling boat on the water. You may enjoy sitting in a Malibu driver's seat so much you forget to take your turn behind the boat. When you drive a Malibu, having fun is not optional — it's expected.

Malibu's exclusive Wedge can even turn a slalom boat into a rider's dream.

Wakeboarding started a revolution in water sports and Malibu's forward thinking engineers introduced hydrofoil technology at the start of that revolution. While the original technology served the first wave of wake boarders well, the sport has changed. Experienced riders are using longer line lengths, traveling at increased speeds and crossing the airways at greater altitudes and with more frequency than ever. Malibu has advanced the revolution once again with new hydrofoil technology for 2002. We now offer specially designed Wedge technology to suit any Malibu hull.

It's as simple as lowering your Wedge through the access panel in the swim platform to create radical ramps. The wakes are bigger, the boat is safer and the process easier than using water sacks to displace the hull. When they want to reach for the wild blue yonder, more than 95% of Malibu owners are opting for our exclusive Wedge technology—available only on Malibu boats. You will never feel the same about wakes again.

malibu

When we set out to power our award-winning boats we weren't shy about what we wanted. To give our customers the optimum boating experience, we needed major league power. There was only one option – the very best. After all, you don't pour your heart and soul into a product and then settle for something less. So, GM Powertrain and Indmar Marine Engines have given Malibu first choice when it comes to their world-class line up of power plants. Malibu Boats was the first inboard company to introduce GM's Vortec engine to the water sports world. Others followed, but have yet to achieve the incredible 387 ft. lbs. of torque and reliability developed by the Monsoon 325 MPI engine. Our Hammerhead 365, Corvette LS1, Vortec 8100 completes the line-up that enables Malibu owners to pick their own, best buy. Every Malibu engine is custom calibrated and precisely tuned for our hulls and every engine is backed with a Transferable 3-Year Warranty that includes fuel and electrical systems. The 2002 Malibu engines are major league all-stars. Of course, we wouldn't offer you anything less.

AFTER ALL,  
YOU NEVER  
DREAMED OF  
PLAYING IN  
THE MINOR  
LEAGUES.

*"Nearly all men can stand adversity, but if you want to test a man's character, give him power." — Abraham Lincoln*

The Monsoon 325 MPI engine has been the power behind five World Records and four Boat of the Year awards.

The immensely popular Corvette LS1 hits the water with over 375 horsepower and the distinction of being "one of the 10 best engines in the world" according to Ward's Autoweek.

The Vortec 8100 is standard in the Sunscape 25LSV and develops an incredible 425 horsepower, enough to tame the wildest riders.

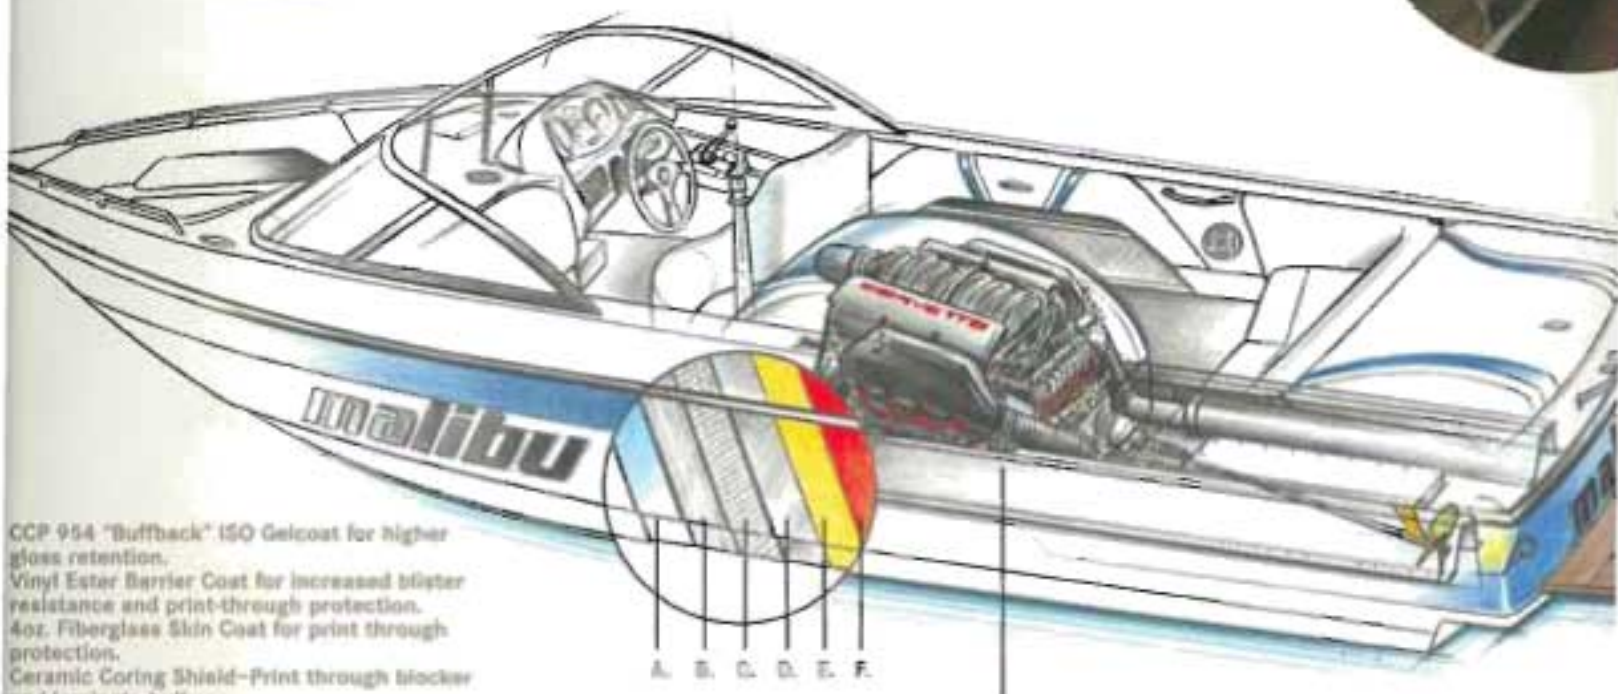

## Precise Mold Construction

Malibu's precision CAD design software enables us to program computerized cutting equipment to cut out and shape a master plug, eliminating the antiquated lifting or clay modeling processes. Our process builds highly accurate molds, resulting in consistent quality and performance in each boat. Each mold is constructed of dimensionally stable resins and ceramics and supported with steel frames to ensure the highest possible consistency.

## Space Age Composite Floor

For 2002, Malibu has quietly advanced technology with the introduction of the sound suppressing Space Age composite floor, which can lower noise levels in the interior by up to 15 percent. This new, Space Age composite provides outstanding strength to weight characteristics and is backed by a Transferable Lifetime Warranty. No wood. No noise. No weakness. No comparison.

CCP 954 "Buffback" ISO Gelcoat for higher gloss retention.  
Vinyl Ester Barrier Coat for increased blister resistance and print-through protection.  
4oz. Fiberglass Skin Coat for print through protection.  
Ceramic Coring Shield-Print through blocker and laminate bulker.  
Hand laid "Stitch-bonded Multi-axis" fiberglass.  
Multiple layers of hand laid 24oz. woven roving.

## Through-Bolted Engine Mounting

Each engine mount is through bolted for strength, proper engine alignment and vibration dampening. Our competitors use lag-bolting or top mounting their engines, resulting in frequent engine misalignments, increased noise levels and lack of structural integrity. In Malibu boats, perfect engine weight distribution results in a dramatic decrease in engine vibration and noise. Malibu Boats built the quietest Intrepid and Sport V6 available in the world today.

## 10-step Gel coat process

Malibu gel coats, among the most respected artists in the marine industry, have over 20 years of experience. Hand-applied tapelines and hundreds of color combinations make each Malibu unique. Specially formulated materials applied in a temperature-controlled environment deliver a sleek and durable finish. Each application is sprayed thick enough (2.3mils) to allow for repairs but not so thick it could lead to cracking, crazing or yellowing of the gel coat.

## The Materials Behind 12 Pt Excellence Awards

From multiple layers of bi-directional fiberglass to the industry leading coring, every Malibu is built to exceed the finest materials available. For 2002, Malibu introduces an exclusive material in the laminate, which eliminates vibration associated with prop thrust. This new MSST (Malibu Sound Supp Technology) is standard on every Lnx optional on all other models. A Transferable Warranty backs every Malibu hull. Door

You are not likely to ever see the backside of your dash, but we want you to know that Malibu engineers take pride in our attention to detail in every aspect of building each, unique Malibu boat. We build quality from the start.

We believe in using quality materials in all of our boats, so Malibu chooses the finest 36oz. G & T Marine grade vinyls, plush carpet and thick foam for interior comfort that matches our exceptional performance.

Our design engineers pay as much attention to the seemingly small details as to the overall design of each Malibu model. It's the little touches, like locking storage, that set Malibu boats apart from the competition.

RESPONSE

RESPONSE LX

SPORTSTER

SPORTSTER LX

PERFORMANCE series

TEAM MALIBU SKIER: DREW ROSS

Sometimes the only thing it takes to generate an inspired performance is the right equipment. Malibu's Response and Response LX are the boats that have inspired five World Record performances and a whole slew of personal bests. You don't have to be a professional water sports enthusiast to be inspired by these boats. You just need a desire to do your best. At Malibu, we're accustomed to winning. With our Response series, you can share in our victories every time you ski.

The Response is built on the award winning SV 21 Diamond hull. This remarkable design has been a favorite of the pros since its creation due to the soft, flat slalom wakes. Response now boats have pulled five current world records in competitive ski events.

You don't have to be a pro to take advantage of the Response. Winner of four "Boat of the Year" awards, the Response is one of the most versatile, high performance ski boats ever built. No wonder its popularity only grows each year.

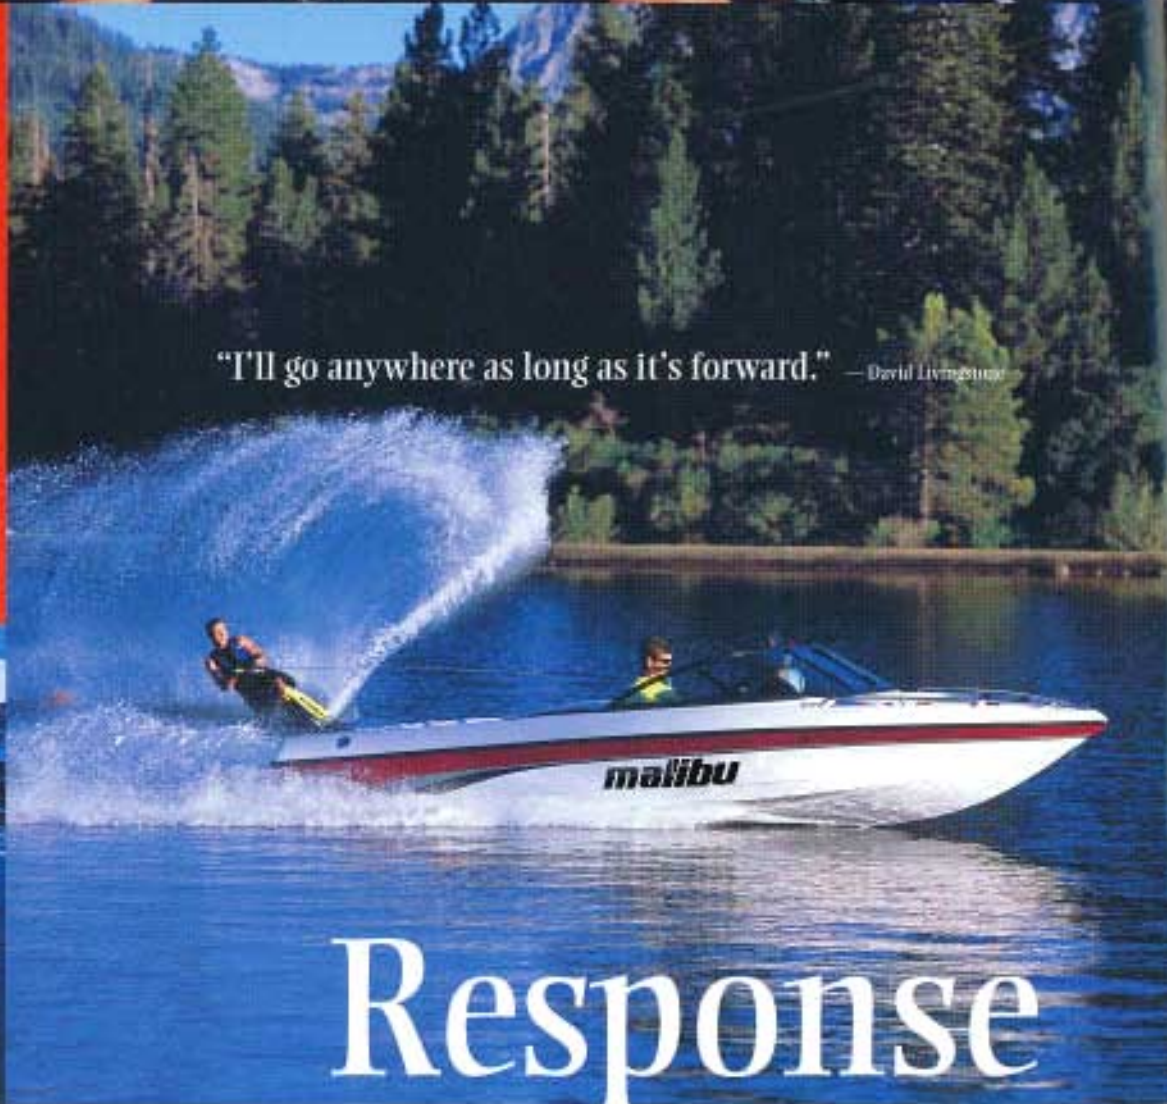

13

When you sit behind the wheel of a Response, you control the power behind world class performance. Our new titanium look steering wheel has been molded for perfect grip. The throttle knob has been redesigned for the ultimate in comfort. More importantly, this champion tow boat provides comfortable control and broad visibility for safe, performance-enhancing pulls.

≡ The cavernous storage of the Response provides ample storage space to accommodate your performance tools and all the necessary accessories, easily accessible when the conditions are right for you to pull out all the stops.

"I'll go anywhere as long as it's forward." —David Livingston

# Response

If you slalom, trick, barefoot or jump there really is only one serious boat to choose – Malibu's Response. Don't just take our word for it, though. Get out there and try it for yourself. Maybe you will feel the same way Phil Ingle, chief driver of the European Tournament Championships feels. He deemed it "The best boat I have ever driven," then described the pinpoint control, the sports car like maneuverability, saying: "It gave me a feeling of driving on a rail." No wonder the Response is as popular with skiers as it is with drivers. The Response – It deserves its name. It has earned its reputation. Put that power behind your own performance and earn your own reputation.

## Barefoot package ≡

When you want nothing between you and the water, convert your five-time world record Response to a barefoot record chaser with our customized barefoot package. Includes: Hammerhead 365 MPI, Judges seats, Rear facing speedo, Barefoot pylon and custom graphics.

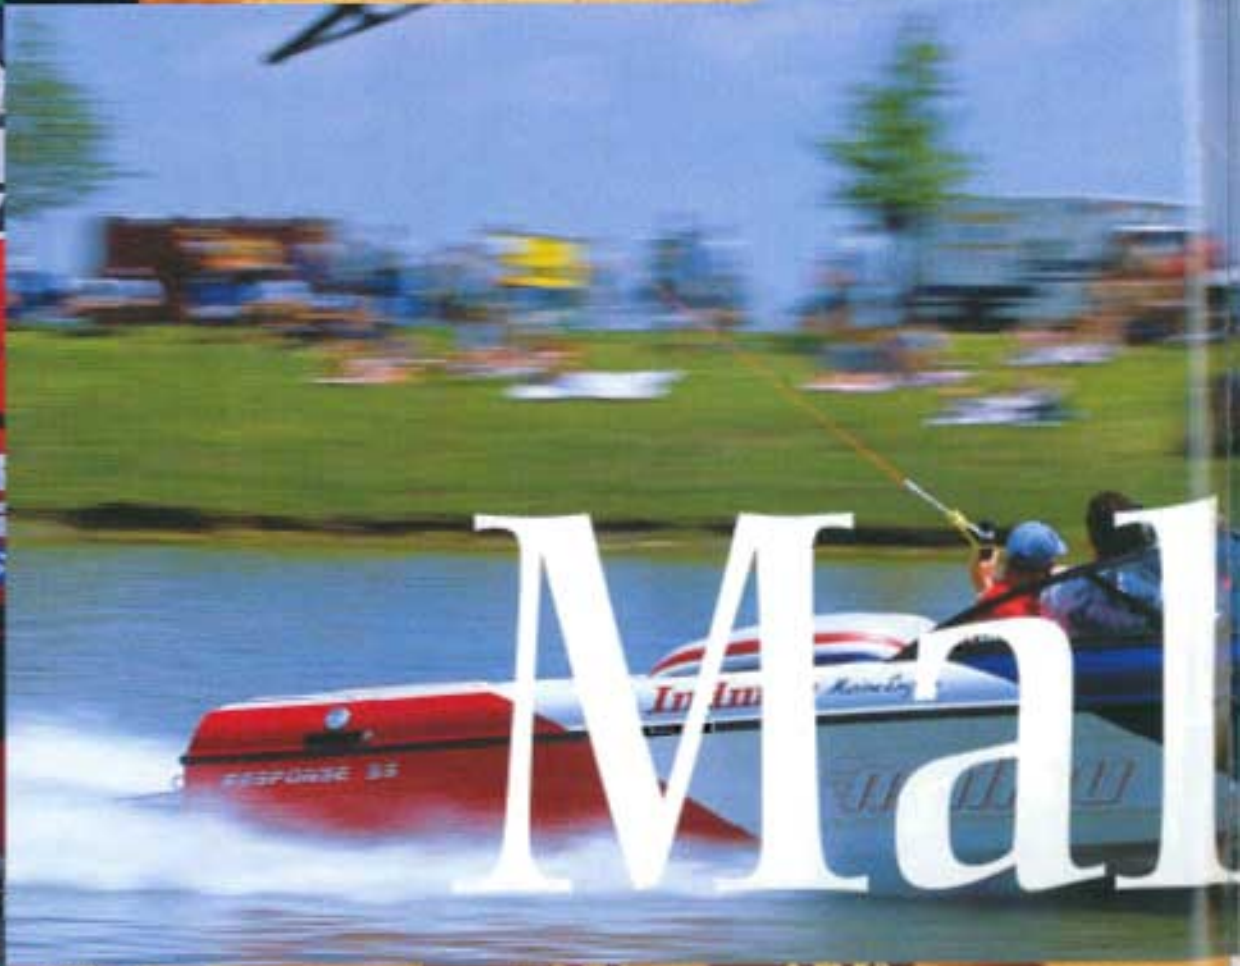

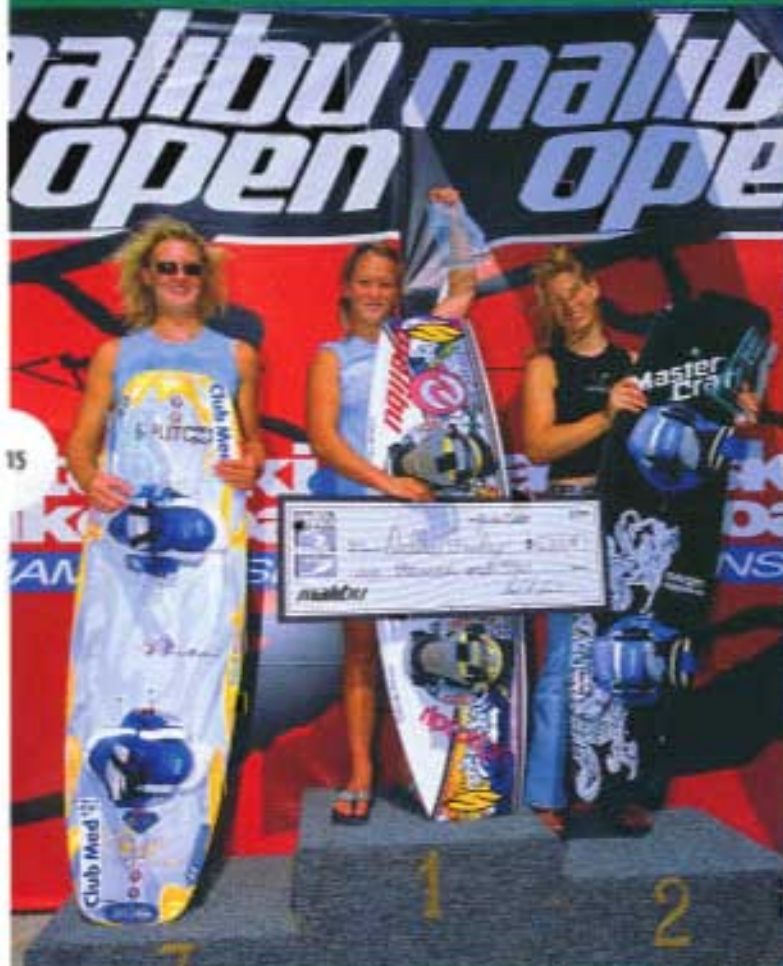

While we've updated our exterior, with new custom gel coat graphics, complemented by dazzling black chrome Malibu decals, most of the changes we've implemented are subtle enhancements you might not notice at first glance. This year we've changed the Response motor box. It now has a lower profile, center-mounted engine housing, which enhances the competition build of this world record setting boat. The sleek profile understates the power within – the incredible Malibu engines that drive this boat to the top level of performance. The new Space Age Compositex floor dampens noise to create a whisper-quiet ride; although it's more likely you'll be shouting with joy at the ride it provides. Our upgraded hand-stitched G & T Marine Vinyl has a cushy 36oz. thick, 100 percent polyester backing and a topcoat designed to withstand punishing marine use.

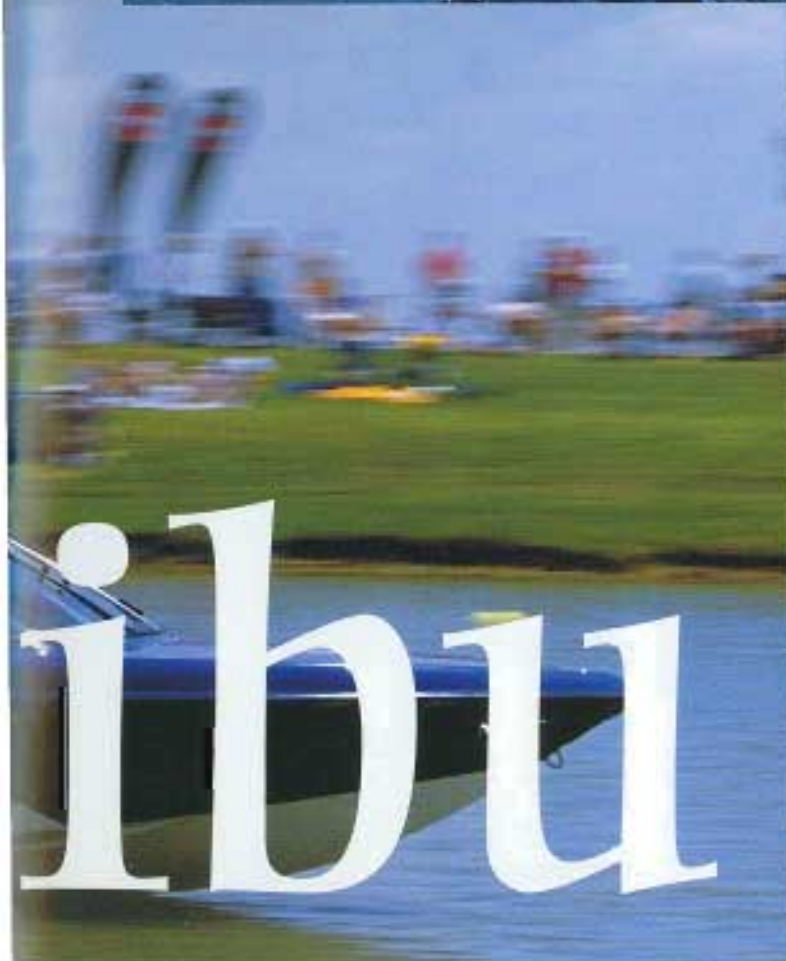

THANK YOU TO OUR SPONSOR: DALLAS FRIDAY

that showcases water sports in its best arena. It takes a different kind of company to conceive such an event. A company like Malibu. It's a company with attitude. And that attitude works its way from the top down.

TEAM MALIBU SKIER: NATHAN HARTNICK

Bob Alkema, President and CEO of Malibu Boats, sums up the Malibu attitude toward success with one statement: "Nothing is ever as good as it can be." This explains the inception of the Malibu Open — a veritable smorgasbord of in-your-face action for onlookers, featuring the top pros in ski fly, wakeboarding, slalom and tricks for men and women. Intense competition and top level athletes combine to create the best test conditions for our boats, so Malibu supports water sports professionals.

At the inaugural 2001 Malibu Open we put them through their paces, and we put our elite performance boats, from the Indmar Marine Engine powered Malibu WakeSetter to the Indmar powered Malibu Ski Fly Boat, to their best efforts. We know that whatever works best for the pros works better for you. We take their feedback seriously and know how to translate it into better boats. You may not win records, but we'll give you the best boat for pursuing them.

Our Sportster series provides no-nonsense performance for those buyers who are looking for the quality of a Malibu boat with finance friendly support. Mirroring its bolder contemporary, the Response, in maneuverability, the Sportster is a perfect introductory water sports machine. Constructed with the same exacting standards of all Malibu boats, the Sportster series enables budding enthusiasts to enter the water sports market and experience the satisfaction of owning an expert-level tow boat. After all, it's how much fun you have that counts. Like other Malibu boats, the Sportster will take your performance to new levels and beyond.

“One of the best ski-boat buys on the market.”

—WaverSki Magazine

Second only to the world-record setting Response in speed, the Sportster and Sportster LX come equipped with our 310 Vortec engine. The power it generates handily outperforms boats that are double the price. With the reliable Malibu name behind its design, the Sportster readily bypasses all competitors in its class. Whether you plan to rip through the slalom course or take flight on your wakeboard, the Sportster provides all the power you need to reach your peak performance level.

Increase Sportster storage by equipping it with ski racks and net storage in the gunnels.

AKESETTER VLX

AKESETTER LSV

AKESETTER XTl

AKESETTER LXI

AKESETTER

« Malibu has demonstrated our commitment to wakeboarding not just by designing the best wakeboard boats, but also by offering Just Ride wakeboard clinics across the country. We want Malibu owners to get the most out of their boat. Sharing the tips and techniques of the pros is one way we can help.

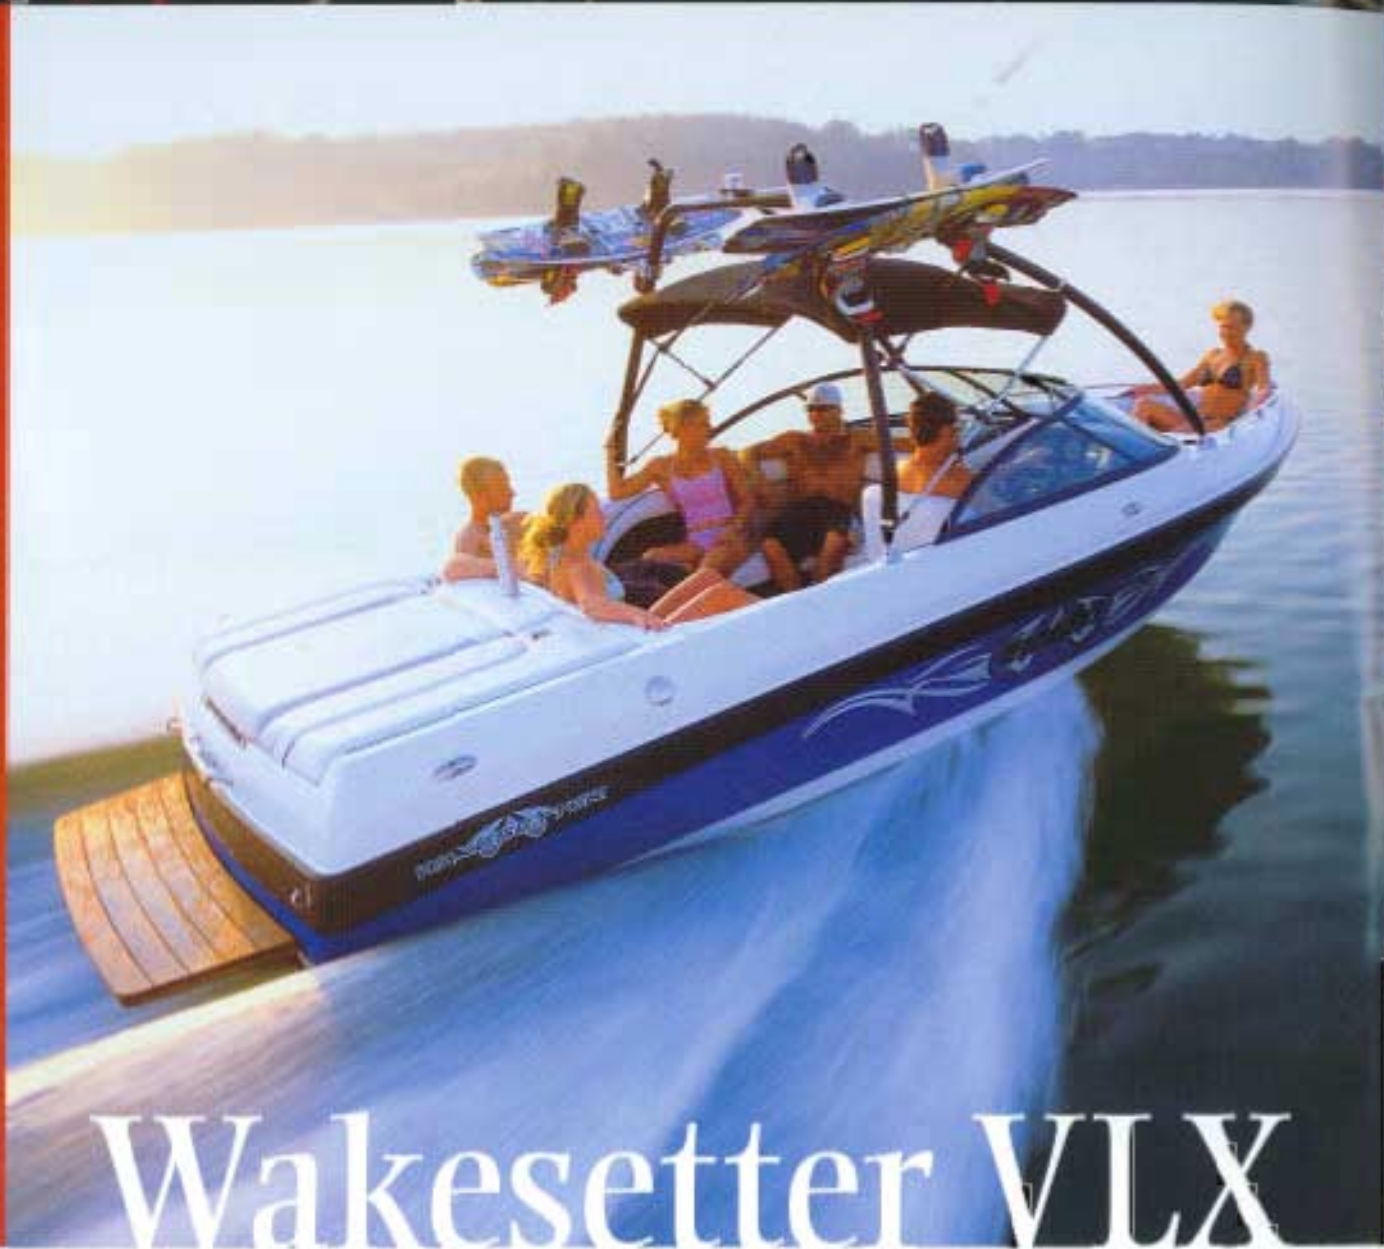

This year Malibu has created new multi-layer graphics designed specifically to distinguish our Wakesetter series from other water sports boats. It's a right of passage—the ultimate look for the ultimate wakeboard boat.

It's not just a sport; it's a lifestyle. It's not just wakeboarding, it's going for the rush, pushing yourself to the limits and trusting that you can embrace the full spectrum of adrenaline-pumping experience. This isn't your parents' invention, this is a revolution for a new generation and Malibu has built and refined the machinery to support your personal attack on fun. We have a full spectrum of Wakesetter models, designed to encompass every nuance of the sport that's launched a new wave of relentless recreation. Whether you prefer to take flight with a whole tribe of passengers in your boat or a just a handful of onlookers, Malibu has a boat for you. Wide, rumpy wakes and rambunctious power characterize our Wakesetter series, any one of which will help you soar to new heights.

In wakeboard tournament competition, the Wakesetter VLX stands out as the reigning champion. Drivers love the hand wrapped and stitched craftsmanship of the integrated dash, featuring the easy visibility of 5" Servo gauges. They also praise the way it handles, with Malibu's Instantaneous Response Technology – featuring Rack & Pinion Steering, Zero Friction throttle cables and customized underwater gear. Top riders love it too. The designated tow boat of the Malibu Just Ride Series, the world's only exclusive professional wakeboard series, the Wakesetter VLX has been the winner in every major wakeboard tournament. In fact, five out of the top 10 riders chose the VLX as their preferred tow boat at the 2000 *WaterSki Magazine* America's Cup, the only event where the riders are allowed to select their tow vehicle. It came as no surprise that Malibu towed home the winner.

# Wakesetter VLX

# boat like this.”

—Waterski Magazine Test Team

« The spacious VLX interior includes wrap around seating that hides a 60 quart ice chest. The ample rear storage holds all your favorite toys, while the roomy interior comfortably accommodates the whole gang.

For 2002, the VLX has been retooled with new deck lines, a convex windshield, and expanded interior space. Optional bow headlights ensure a safe return home after you've exhausted the last of the day's rays.

Gerry "The Flying" Nunn

With a hull design that reduces bow rise, the Wakesetter VLX stays flat in turns and makes negotiating them more precise. Malibu now offers a center and rear Malibu Launch System (MLS) that can fine tune ballast with three different switches in order to tweak the wake to your preference. Also new this year, and exclusive to Malibu, is the Malibu Sound Suppression Technology (MSST). Integrated in the fiberglass lay up of the boat, MSST significantly reduces noise from prop thrust vibration, creating the quietest ride on water. This remarkable design for significant noise reduction is one more Malibu innovation that pushes the competition to the edge.

GET BETTER  
THAN THIS.

Dramatically spacious. That's the Wakesetter LSV in a nutshell. No other wakeboard boat has been designed to accommodate so many people in such luxuriant comfort. The Wakesetter LSV seats 1-4 and has room to stow all their gear. Appointed with a bounty of extras, the Wakesetter LSV offers room to stretch your legs, place your drinks and watch riders soar off its huge wakes. Fire up the available JVC stereo with Infinity speakers, sub-woofer and power amplifier and jam as you ride. Standard key features include: Center and Rear Malibu Launch System ballast, the wake-enhancing Wedge, two pairs of pop-up cleats, dual gas fills and a pop up bow light. For 2002, the Wakesetter LSV includes the new integrated, hand stitched and wrapped dash, leather wrapped throttle knob and available power seat option. Bold new century color combinations brighten its look for 2002.

©2004 Malibu Boats, Dallas, Friday

Whether you take the entire extended family or just a couple of friends, the Wakesetter LSV adjusts to its load and provides huge, rampy wakes for aerial stunt mastery. Passengers ride in style and comfort with the plush cushioned interior and the generous coolers for storing refreshments.

When it's time to just enjoy the scenery, the new transom remote stereo lets you crank up the tunes while you swim.

« She's a champion—the gold medal winner at the X-Games, Gravity Games and Vans Triple Crown, who embodies the attitude and achievement of the 21<sup>st</sup> century female athlete. Number one on the tour, number one in the hearts of *Wakeboard Magazine* readers.

Wakesetter LSV

# WHAT YOU GET WHEN YOU CROSS V-DRIVE COMFORT WITH DIRECT DRIVE PERFORMANCE.

Our new Wakesetter XTi fuses explosive power, performance and handling with a unique layout in a mid-engine boat. It's hard to believe a boat that can comfortably seat 13 also has the power to provide the pull you want when you're ready to ride. The XTi is a true cross-training machine, with an interior designed for optimum capacity, ergonomics and blissful relaxation. The direct drive design coordinated with Malibu's award winning SV23 Diamond Hull and the Instantaneous Response System (IRS) make for a superior handling experience.

When you deploy the wake-building Wedge, flip the Malibu Launch System (MLS) switches to fill the midship and rear ballast tanks the XTi transforms into a pro rider's wonder machine. It's just what Malibu's engineers imagined when they conceived this new breed of boat.

The bow holds two insulated self-draining ice chests, while another 30-quart ice chest is built into the lounge area.

The seating configuration encourages the natural ballast of passengers in the rear of the boat with its wrap-around lounge. Additional seating includes a swivel driver's seat, an oversized observer's seat and an enormous bow and center filler cushion. For those passengers who want to lie back and relax, Malibu replaced the engine box with a large center mount sundeck, which extends behind the driver all the way to the boat's interior side panel.

Expansive storage cavities are tucked throughout, including space behind the observer's seat back, beneath the main sundeck, and a platform accessible, rear-locking trunk that doubles as a sundeck. Standard riding accessories include a collapsible tower, three-ballast MLS (Malibu Launch System) and a wake building Wedge. Personalize it with great optional features like a remote stereo control and a second rear heater.

**“If you have a skier, a rider, a performance junkie and a status seeker all in the same family, this is your boat.”** — *WaveSki Magazine*

With gel coat color that stretches from the rub rail to the first chine line, the Wakesetter LXi makes a colorful and lasting impression at first glance. This versatile boat captures all the power, comfort and maneuverability a family of water sports enthusiasts can handle. Whether you seek air or just like to surf the wake, the Wakesetter LXi offers the versatility to satisfy your personal style. The standard options, including two removable launch seats, wake-building Wedge and Malibu Launch System, can be customized to suit your needs. With acceleration and top speed approaching that of much smaller inboards, and built on the award-winning SV23 Diamond hull, the Wakesetter LXi handles like the “Towboat of the Year” it is. With bold new tribal art tattoo-style graphics, the Wakesetter LXi is clearly no poser. When you want a true wakeboard boat, look no further.

TEAM MALIBU RIDER: MARIE BOLIVSO

Built on the award-winning SV23 Diamond hull, there's no shortage of room in this 21' 8" wake thrasher. And because we know you'll want plenty of company along to celebrate your performance, we've designed it to stow extras in just about every available space, from the bow to the observer's seat, to the gunnels and the trunk. The Malibu Launch System, featuring a 500 pound ballast that fills and drains at the flip of a switch, is conveniently located in the center floor compartment.

Proving that it actually *is* possible to please everyone, the Wakesetter LXi combines the punch of board launching wakes with the speed and control of an award-winning tow boat. Simply raise the collapsible tower and lower the wake building Wedge to make an easy transition from boat to board performance power machine. The power and maneuverability take care of themselves.

“When you have to keep reminding yourself that you are in a value priced boat, you know it’s a good thing.” —Kauai Magazine

The bold new gel coat color combinations and the tribal art, tattoo-style graphics of the Wakesetter convey the distinct attitude of this boat. But the power, performance and versatility are traditional Malibu excellence through and through. For riders who are looking for their first, true, wakeboard boat the Wakesetter heeds the call. It comes standard with a collapsible tower, Malibu Launch System (MLS) and a wake-building Wedge – the perfect combination for maximizing air time.

The Wakesetter's all new sport interior features bold splashes of color and a newly designed dash and throttle console with 5" Servo instrumentation. Perfectly positioned for fingertip control and optimum visibility, drivers will experience the comfort behind Malibu's incomparable reputation when they find themselves behind the new dash in the comfy swivel seat. Lockable rear storage accommodates wakeboards and accessories. The standard tower, launch system, removable launch seats and wake building Wedge turn this into the wakeboarding machine it is meant to be. A new, CNC Machined Propeller provides smooth, strong acceleration and Malibu's exclusive Space Age Floor System has a sound dampening effect to create a quiet ride, even if the ride outside the boat isn't. The Wakesetter offers newcomers a chance to enjoy all the advantages of owning a Malibu.

SUNSETTER

FAMILY PERFORMANCE series

Expectations can be tricky. We know Malibu owners expect nothing less than unparalleled performance from our world-record producing Response series. We also know that Malibu owners who look at our Sunsetter LXi are in the market for a great family boat. We just happen to believe they should expect great performance too. So while it offers an expansive interior and 18 cubic ft. locking trunk among its multitude of storage locations, the Sunsetter LXi also features Malibu's Instantaneous Response Technology (IRT), three tuned tracking fins, 5" Servo competition instrumentation, standard CNC machined propellers and venturi speedometer pickups. Did we mention that our new floor design has made conversation easier, thanks to the Space Age Composite that dampens sound and provides a quieter ride? The finely crafted interior includes air lumbar support for the driver's swivel seat, a bow center cushion and wind-block partition for passenger comfort, a custom throttle knob and a three-piece back seat. The exclusive, optional, Malibu Wedge creates heart-thumping wakes for riders. So, while you might not expect it, we believe the Sunsetter LXi delivers an unusual combination of luxury and performance. *WaterSki Magazine* thinks so too. They said: "Its rare you can spend a day in a boat and not wish

A self-draining ice chest enables you to take a day's worth of refreshments along in the Sunsetter LXi. We designed it to accommodate

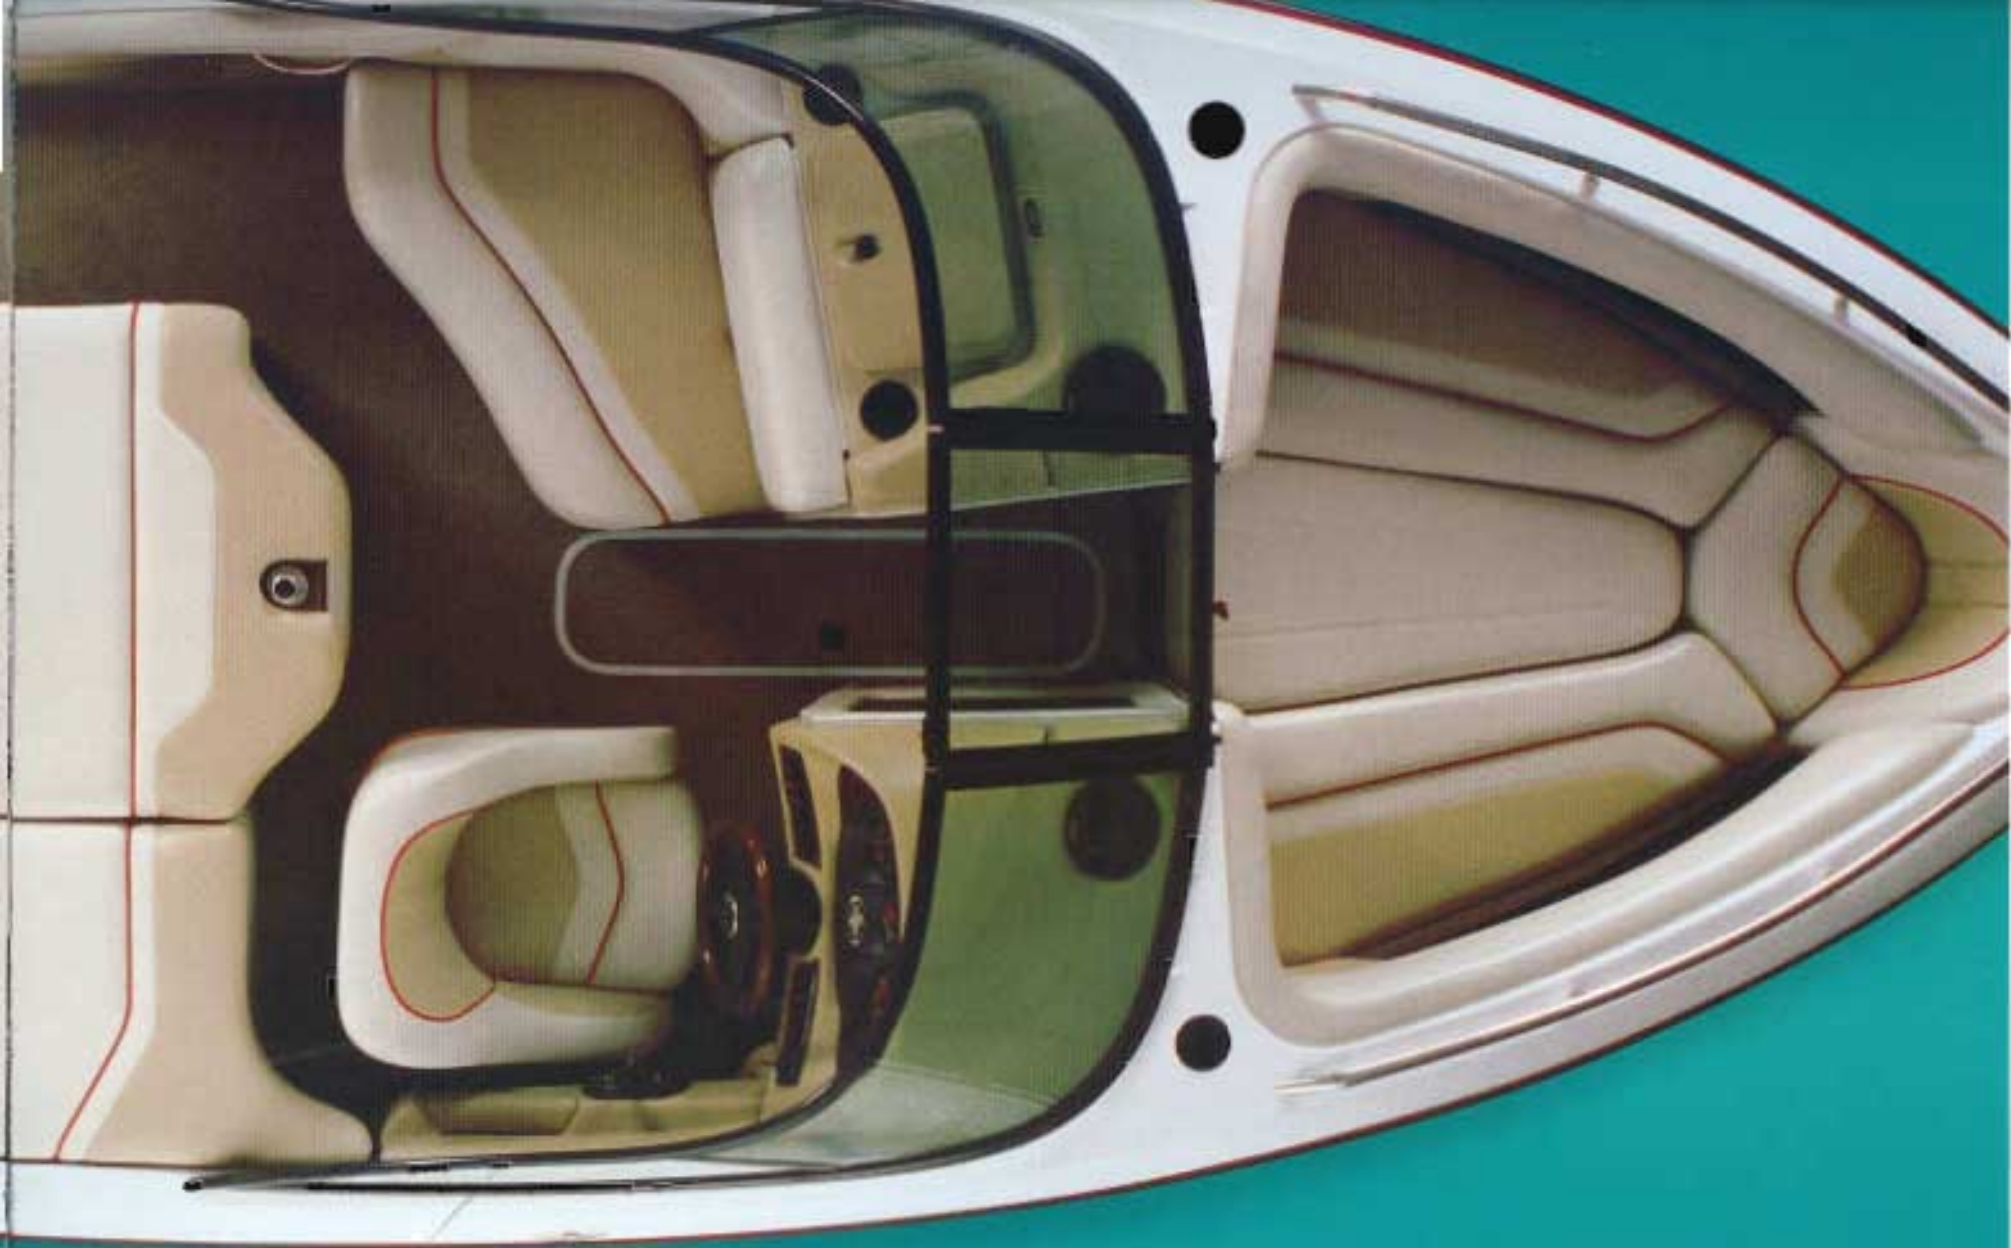

# SOMETIMES YOU JUST HAVE TO GO TO EXTREMES.

The 2002 Sunsetter XTi offers a unique blend of direct drive versatility and performance with the first wrap-around seating layout. This lounge seating arrangement creates a roomy interior that can comfortably accommodate 13 passengers and their cargo. Yet it doesn't sacrifice direct drive handling. With the engine positioned forward and a new 12 degree prop shaft angle, the Sunsetter XTi provides the power to generate the performance you want and the flexibility to tailor wakes to every need. The spacious lounge area features a removable table, ice chest, multiple cup holders, safety grab handles and an available remote stereo control. The center-placed sundeck enables loungers to stay involved in the conversation. There's extra room to stretch out in the bow area, which includes a standard insert cushion.

Our designers consider extra storage whenever they configure space. The Sunsetter XTi accommodates plenty of toys and accessories.

Sunsetter XTi

The direct drive power of the Sunsetter XTi supports outstanding slalom performance. This is a rugged luxury boat that handles whatever demands you have with confidence. Passengers, drivers and skiers will all be impressed with its appointments, from the comfort of the ride to the dependable power of the pull. It's the kind of boat that appeals to a sporting family that prefers to explore in comfort. Whether you choose to cruise on open waters or run a slalom course, the Sunsetter XTi will take you where you want to go.

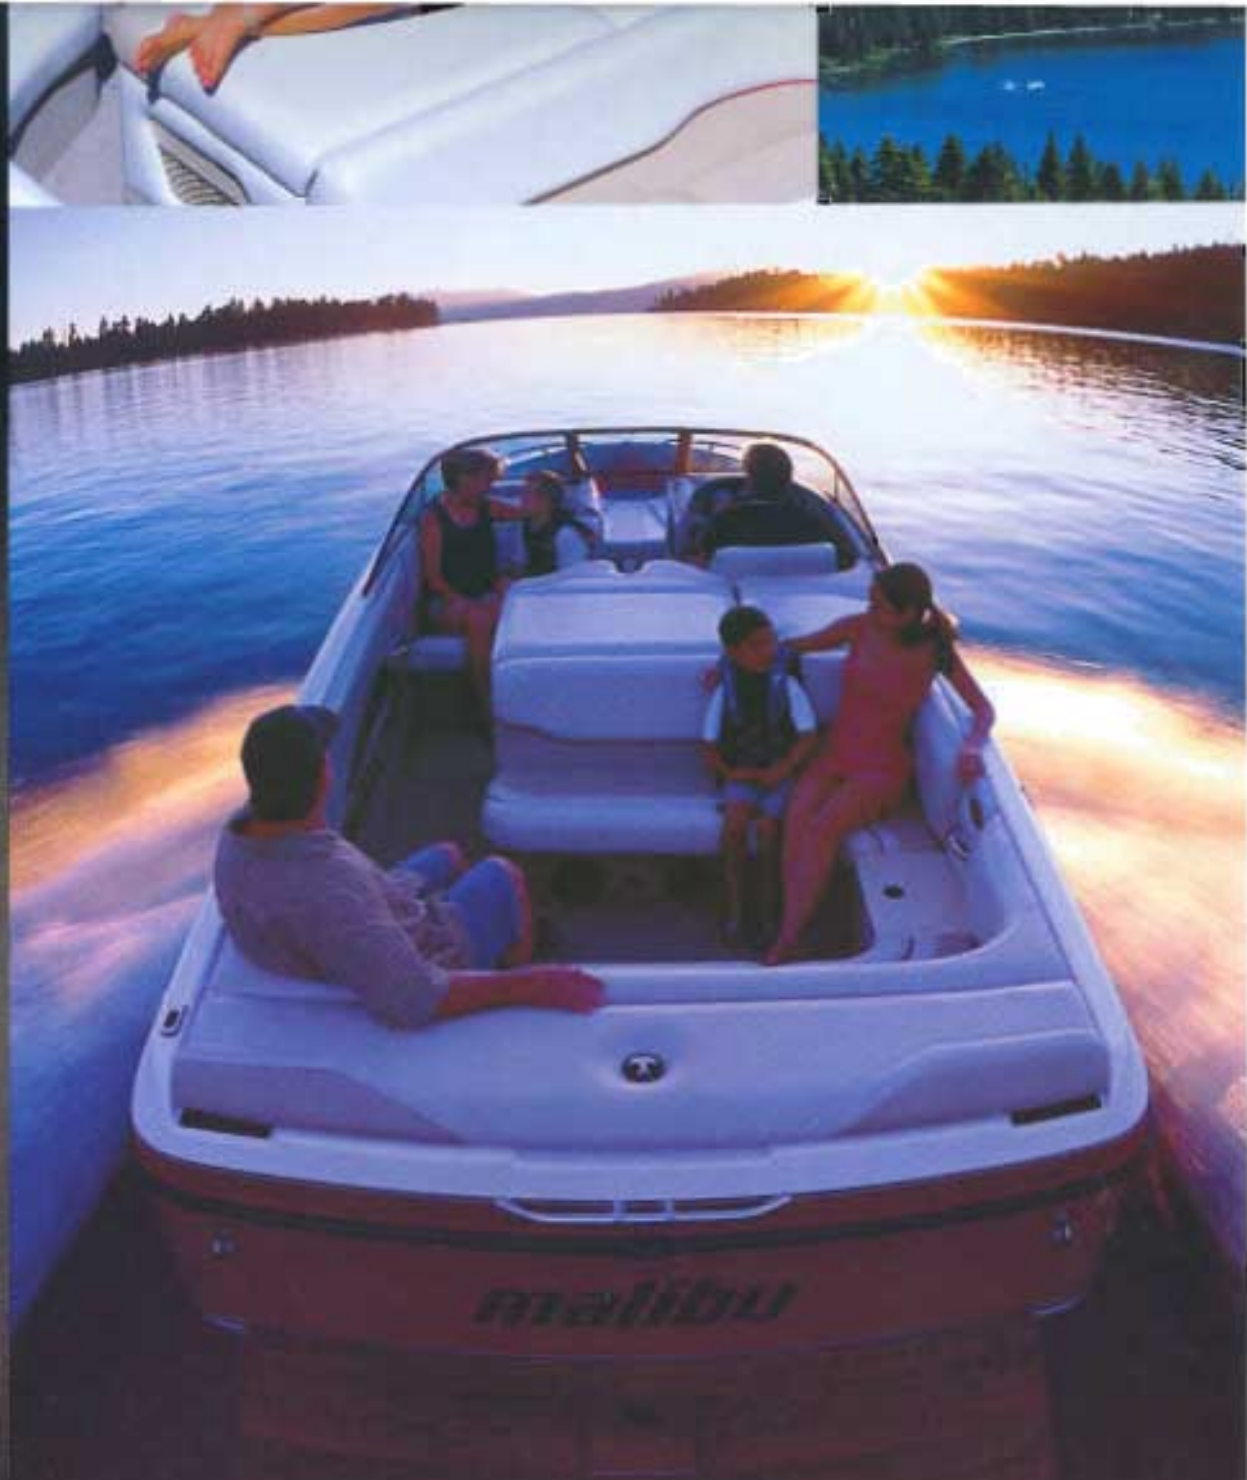

The original wrap-around seating creates a comfortable lounge arrangement for those times when you feel more like socializing than exercising. With a remote stereo control and removable table, you can have a picnic, play a game of cards, or just savor a great conversation.

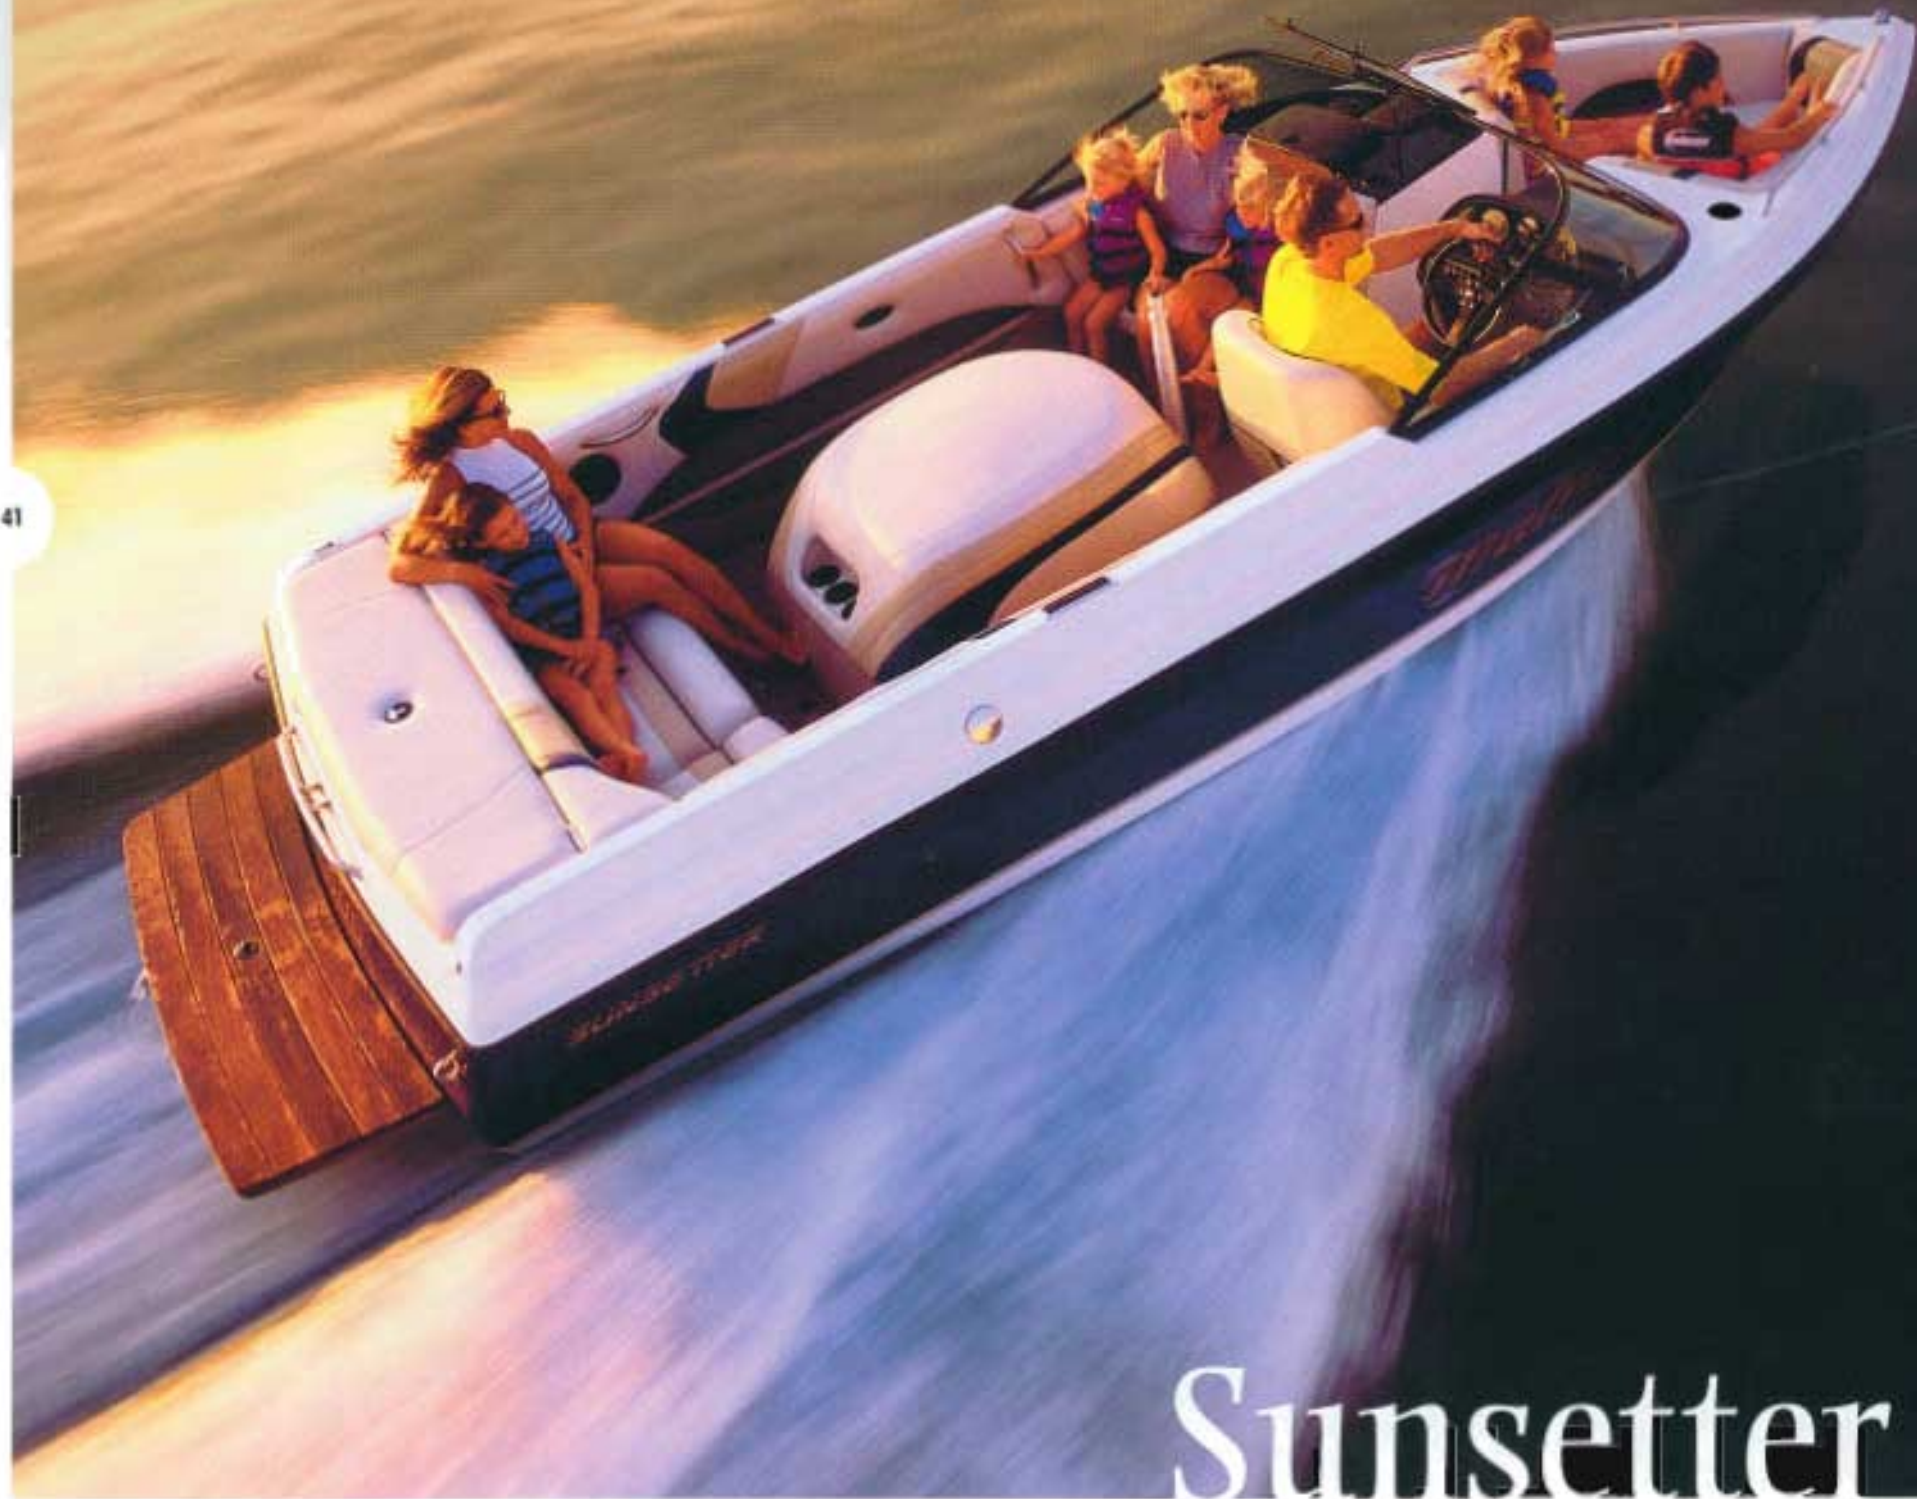

## V-DRIVE COMFORT, DIRECT DRIVE HANDLING

Take a boat full of rowdy friends or just a handful of family members. The Sunsetter XTi is designed to fulfill your quest for enjoyment, to perform in all conditions and can handle up to 11 people on board. If you are good at more than one thing, why hide it? That's what the Sunsetter XTi is designed for, with its versatile capabilities, Sport-V comfort and direct drive handling you can tackle whatever watersports discipline you prefer and expect the power you need for a satisfying performance. So whether it's extreme air or cutting through glass, or just taking in the scenery, the XTi will take you there in comfort and style. When you want a family boat that meets performance criteria while keeping family comfort in mind, the Sunsetter XTi is the right boat for you. The standard Monsoon 325 engine provides the power, while the direct drive ensures performance. If you plan to spend plenty of time on the water, it makes sense to get the most comfortable ride you can. And if you demand top quality sports performance, the Sunsetter XTi is a great choice.

# Sunsetter XTi

Sunsetter

# DEMAND SIZE. CRAVE PERFORMANCE. GET BOTH.

The Sunsetter has been a popular family performance open bow since we first introduced it. It retains its popularity because it continues to appeal to a variety of tastes, from the recreational family skiers to the once hard core slalom addicts who choose to age gracefully and keep up their athletic endeavors. Updated for 2002 with colorful new upholstery interior design, a new dash and throttle console and our new CNC Machined propeller, the Sunsetter continues to satisfy performance-hungry buyers.

The open bow Sunsetter is a perennial favorite among families looking for that perfect blend of value, luxury and performance. And it's built to the same exacting standards as every model in the Malibu line, so you will discover Malibu's precision attention to detail throughout.

For 2002 we have added a lockable rear storage center. Keep your toys handy. You never know when the mood will strike you.

SUNSCAPE 21LSV

SUNSCAPE 23LSV

SUNSCAPE 25LSV

SPORT V series

Malibu's Sport-V design is the intelligent alternative to Inboard/Outboard configurations for water sports enthusiasts. If you want performance not just behind the boat, but also from the driver's seat, there really is no comparison. The Sport-V design eliminates the bow rise, compromised turning and added expense associated with Inboard/Outboard configuration. And with a Malibu Sport-V you can get exactly the boat you want. We offer you a choice of colors, not prepackaged patterns, but the opportunity to select exactly the right combination to reflect your personality and taste. Each color is meticulously sprayed in the mold for added luster and durability. When you purchase your Malibu Sport-V, you can rest assured it will be like no other boat on the water.

Each Sunscape is powered by a Multi-Port Fuel Injected GM Vortec engine which develops more torque and horsepower than any other standard engine in its class. Unlike our competitors, Malibu utilizes the same expensive performance components in our family series boats as we do our competition series. We take pride in crafting exceptional boats. From the hand-stitched and hand-wrapped dashes to the smooth ride and reduced noise level, to the thoughtfully designed comfort features, everything about our Sport-V series exudes superior quality. That's why you can depend on Malibu to deliver outstanding handling and sport performance wakes.

# LET THE ATTITUDE BEGIN.

"If you find it comforting to have a boat that is exceptionally fast, exceptionally classy, yet capable of outstanding wakeboarding and solid slalom performance, the Sunscape 21 is the obvious choice." - *WaterSki Magazine*

45

The 2001 Sunscape 21 became the first Sport V to win a Product Excellence Award for Performance. Our engineers, being the perfectionists that they are, decided to up the ante a bit for the 2002 model. They have redesigned the deck to open up additional bow and interior space in order to accommodate additional luxury features such as the 60-quart ice chest, wrap-around seating and a hand-stitched dash that extends to the windshield on both the driver and passenger sides.

“There are no short cuts to any place worth going.”

— Beverly Sills

They have improved visibility with the new convex windshield, which enhances the profile of the Sunscape 21 as well. Dual gas fills make it easier to access the pump. And as part of the ongoing Malibu pursuit of cutting edge innovation, this year we introduce our exclusive Malibu Sound Suppression Technology (MSST), to reduce noise level. By incorporating MSST into our lamination process, we have reduced drive train noise by as much as 15 percent. This proprietary sound suppression technology, available only from Malibu, is standard on every Sunscape.

The Sunscape 21 is designed to Malibu's exacting standards. When we chose comfort features to include in this luxury Sport V, we considered what would appeal to us. That's why you'll find an astonishing array of conveniences, from multiple stereo options to ice chests to storage locks, the convenient bow insert cushion, bow wind block, swivel pylon

Drivers will appreciate the unobstructed swivel seat and air lumbar support standard in every Sunscape.

This year we made room for a 60-quart ice chest with convenient accessibility. With its generous seating capacity, we have provided all the amenities to make this Sport V your personal sport paradise on water.

This is the boat that will carry you in comfort to your favorite escapes, and still provide the power you need for performance. With Sport-V drive and comfort, it's perfect for taking the whole family, and there's enough storage to pack all the toys you will want to take along. You will want to make plans around boating, not boat around other plans, when you have a Sunscape 21.

# THE MARKET.

One look at the elegantly appointed interior and it's easy to see this boat exudes quality and craftsmanship. From the courtesy lighting, to the spacious layout, to the plush seating and the new Malibu Sound Suppression Technology (MSST) for that whisper-quiet ride, just looking at it is an open invitation to pleasure.

Malibu Sport-Vs offer a low draft for easier beaching and protection of underwater components, a distinct advantage of the exclusive Malibu Sport-V configuration. It's part of our overall philosophy of design. Our engineers build the kinds of boats we would want to own. So we built our Sport-V onto our high performance award-winning SV 23 Diamond hull and designed it to not only handle well, but to be convenient no matter where you want to stop and enjoy the scenery. We realize, after all, sometimes it's as important where you rest as where you play.

SPORT-V ADVANTAGES

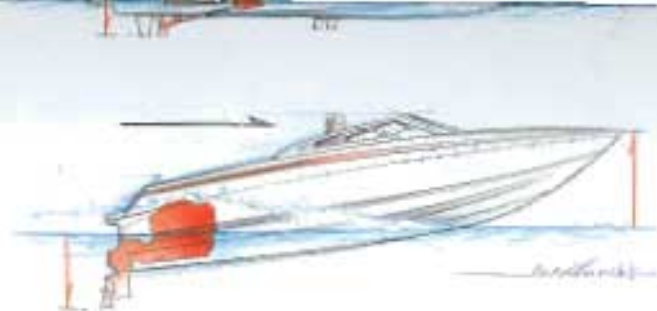

# Sunscape 23LSV

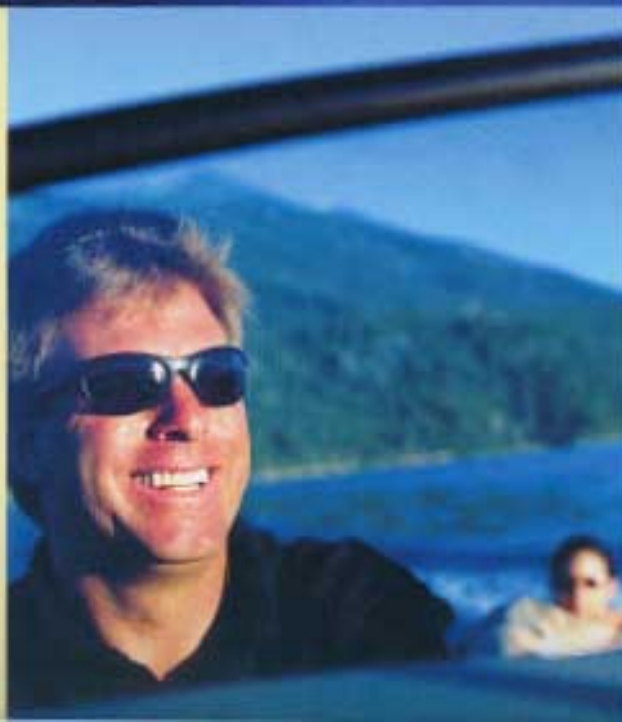

boat that the  
people who  
work at Malibu  
want to buy.”

—*Yacht & Boat*

When you just can't bring yourself to quit at sunset, there's no need to worry. The integrated running lights and interior courtesy lights provide ample visibility to safely light your way home.

When you're all grown up and you want a grown up boat, but you still want the power and handling to accommodate your persistent water sports addiction, the Sunscape 23 is a perfect choice. With the space and comfort to accommodate a family or a group of friends, you can cruise or cut loose across the wakes. The Sunscape 23 will keep the power in your performance but let you kick back and relax whenever you like.

The Sunscape 23 is a true luxury runabout, not a pretender. You will feel pampered by the Sport-V performance because its lower bow rise of only 5 degrees, and quicker time to a flat plane which allows for better driver visibility and peace of mind on crowded waterways. The bulky underwater housing of an I/O creates drag that impedes performance. They also waste power and torque as they go through a complex set of gears on longer route from the engine to the prop. That's simply not the case with Malibu's Sport-V, which offers a smarter alternative to the I/O.

SPORT-V ADVANTAGES

Malibu's Sunscape 23 ISV is a shining example of how Sport-V technology can provide the responsive handling of a smaller inboard and the spacious layout of a luxury runabout. The Sunscape 23 is designed with your ultimate comfort in mind. For 2002 we have added new Malibu Sound Suppression Technology, which is layered in the gel coat as it is being sprayed into the mold and strategically placed throughout the boat to effectively reduce water and ride noise and enhance your ability to relax and experience the ride.

The 2002 gel coat graphic design accentuates the flowing lines of the Sunscape 23 and successfully captures the feeling of powerful motion. Malibu's stainless steel bow rails have been reshaped for added comfort and a more secure grip, and drivers will appreciate the hand-sewn dash with a new sure-grip steering wheel. As with all Malibu hulls, the Sunscape 23 is Wedge compatible, so boarders will feel right at home.

« You choose the stereo system you want, we ensure it will add to your boating experience. With the integration of our new Malibu Sound Suppression Technology, the quieter ride allows you to have a richer experience with the touch of a finger. We pride ourselves on building quality that is reflected in every detail, and we know close inspection will verify our commitment.

## THIS BOAT DOESN'T JUST PULL YOU, IT PULLS YOU IN.

There's something irresistible about Malibu's Sunscape 25. It's not just that Malibu has a reputation for building superior quality boats, or the fine attention to detailing for which we win awards. The pull of the Sunscape 25 is from a deeper level. You just know—this is the boat for you. It is a breed apart. A marvel of intelligent design, it is a deeper, wider interpretation of Malibu's extraordinary award winning water sports boats on an enormous 25-foot hull.

From the integrated running lights to the custom Wedge technology, the Sunscape 25 is designed for you to have a vacation on water. Take a tour around the longest of lakes, thanks to the 80-gallon fuel capacity, or pause to put in some time above the wakes, the choice is yours. Because it's a Malibu, the Sunscape 25 has a water sports pedigree with a solid backing of award-winning craftsmanship.

This long, lean, sleek bodied Sunscape 25 pleases the eye, excites the soul and pulls riders and skiers alike. And because you will want to stay out for a while, it features cavernous rear storage with hydraulic lifts and a security lock. You will have to be creative to fill all the storage space available in the Sunscape 25. As it accommodates an abundance of passengers and their possessions, the Sunscape 25 works equally well as a tow boat for those who can never just sit back and relax.

The Sunscape 25 provides the convenience you want for exploring large bodies of water and is loaded with first class amenities. With this in mind, we have redesigned the head storage area with a new finish and liner for 2002. >>

55

Malibu's Sandscape 25 caters to the driver with a six-position power seat, zero friction throttle cables, rack and pinion steering, optional cruise control, a feature-rich dash and throttle console with 5" Servo instrumentation. While the driver sits in the lap of luxury, passengers are not forgotten. They might take turns in the passenger-side swiveling bucket seat next to the driver, or choose the lounge in the spacious bow. A filler cushion adds room for more. There is also the roomy mid-ship lounge seating, with or without Malibu's removable table.

Safety is always foremost in the minds of Malibu engineers, and a primary consideration throughout the design process. So when we introduced our Sport-V technology we saw immediate advantages over competing technologies. The Malibu Sport-V propeller, secured under the boat instead of hanging off the stern, is inherently safer for swimmers and water sports enthusiasts getting in and out of the boat. Every Malibu Sport-V is equipped with our exclusive IRT (Instantaneous Response Technology) system for precise handling and control of a quicker-turning rudder system. Our windshield is designed with visibility, not just style, in mind.

# Your Malibu

When you own a Malibu you aren't just buying a boat. You own a compilation of aspirations and creative ideas built into reality. You own a product built with pride in craftsmanship and delivered with the fervent hope that it exceeds your greatest expectations.

We have been building boats for 20 years and in that time we have learned a thing or two. We think you will like what we've learned. Every time we apply what we've learned to our design, we write a new chapter in the Malibu history. From Boat of the Year awards

to Product Excellence awards, to world record performances, the positive feedback we have gotten has propelled us toward ever more creative innovation in the water sports industry. Now it's your turn. Go out and make your own history. In a Malibu.

## BUY A MALIBU AND MAKE YOUR OWN HISTORY.

Water sports are like families – a common bond unites them, but they are full of individuals. Malibu boats are designed to accommodate all the individuals who are united by the common bond of self-expression in water sports. That's why we build boats for every discipline and every preference. And every Malibu is unique – you choose your custom color combination, you pick your options, you create the boat that suits your personal tastes and expresses your personality best. But every Malibu boat has one thing in common – exceptional quality.

From glass masters like Chris Parrish to tricky barefooters like Ron Scurio, Malibu boats are the preferred ride for selective professionals. We solicit their feedback to build better boats for you. It must work, because we've been building award-winning
